# BLOCKCHAIN BOOT CAMP PROGRAM

We understand why an increasing amount of organizations are starting to turn their attention towards an emerging technology practice called Blockchain to streamline enterprise operations and reduce costs, drive performance and maximize value. We would therefore like to invite you to come and participate in our Blockchain Boot Camp Program.

The Blockchain Boot Camp Program is an intensive workshop that is tailored to take advantage of the many potential benefits around this new and emerging technology. Blockchain is a new and emerging form of technology based on a growing list of records, called blocks, which are linked using cryptography.

Blockchain is not only about the digital currency, however. By allowing digital information to be distributed but not copied, blockchain technology created the backbone of a new type of internet. The blockchain is an incorruptible digital ledger of economic transactions that can be programmed to record not just financial transactions but virtually everything of value.

Here are some of the potential benefits listed around Blockchain:

- Supply Chain Management
- Quality Assurance
- Accounting
- Smart Contracts
- Voting
- Stock Exchange
- Energy Supply
- Peer-to-Peer Global Transactions

The Blockchain Boot Camp Program provides course attendees with a practical hands-on workshop setting to explore the latest thinking, patterns and standards of government and city leaders, and allows them to immediately apply their new skills to their own Blockchain project. We also build cross-functional skills to solve complex problems, create opportunities, and make a powerful impact by responding to evolving leadership challenges and exposing them to the latest groundbreaking ideas and techniques.
