

# INDUSTRY 4.0 BOOT CAMP PROGRAM

We're in the midst of a significant transformation regarding the way we produce products thanks to the digitization of manufacturing. This transition is so compelling that it is being referred to as "Industry 4.0" to represent the fourth revolution that has occurred in manufacturing.

From the first industrial revolution (mechanization through water and steam power) to the mass production and assembly lines using electricity in the second, the fourth industrial revolution will take what was started in the third with the adoption of computers and automation and enhance it with smart and autonomous systems fueled by data and machine learning.

We understand why an increasing amount of organizations are starting to turn their attention towards the emerging and disruptive Industry 4.0 trends to streamline enterprise operations and reduce costs, drive performance and maximize value, and would like to invite you to participate in our Industry 4.0 Boot Camp Program.

Industry 4.0 is designed to change all that by providing benefits in six specific categories:

- Efficiency
- Agility
- Innovation
- Customer Experience
- Costs
- Revenues

*The Industry 4.0 Boot Camp Program provides course attendees with a practical hands-on workshop setting to explore the latest thinking, patterns and standards of government and city leaders, and allows them to immediately apply their new skills to their own Industry 4.0 project. We also build cross-functional skills to solve complex problems, create opportunities, and make a powerful impact by responding to evolving leadership challenges and exposing them to the latest groundbreaking ideas and techniques.*
